

Recommendation Letter for Ryan Nand

It is my great pleasure to recommend Ryan Nand for the position he is applying with your company. I have known Ryan since September of 2020. He was a student in my ECE-425/525 Digital IC Design I class in the Fall Term of 2020. Ryan is one of the top students earning top grades in the class.

Ryan is highly motivated and intelligent. He has excellent hands-on skill and programming skill. He is also a good team player. He worked collaboratively with his project team members with respect and trust to each other. He learnt Cadence virtuoso tool to design inverters and design combinational logic circuit CMOS compound gate. He did both of the circuit design labs with high quality work.

Digital IC Design I is a very hard class. This is one of the highest senior/graduate level Digital IC Design courses in our program. There are so much circuit design concepts to learn. There is so much to learn in a short term of 11 weeks. Ryan has very good grasp of knowledge in IC design and showed strong analytical skills. He not only did all the assignment well, but also did the exams well. I am impressed by Ryan's performance in the course.

Ryan not only excels in all the classes he took with me, but also is willing to help fellow classmates. He is a great team player.

I highly recommend Ryan for any electrical and computer engineering position he is applying. I believe you will be very impressed with him and pleased with your selection. He is extremely capable in areas including digital IC design, RTL programming and FPGAASIC design. He has demonstrated excellence, passion and leadership in all that he puts his mind to. He has great potential to make a significant difference to society and contribute to any engineering groups. Should you have any questions, please don't hesitate to contact me at yuchen@pdx.edu or 971-246-9214.

Sincerely,

Yuchen Huang

Instructor, Electrical and Computer Engineering
